First time sanding

Product complete

Apply the veneer and go through the second time hot press process

Second time sanding, polishing and cutting into the right size

Plywood

Our A grade plywood is suitable for all kinds of fancy constructions or furniture manufacturing. The veneer and core materials that we use are top of the line along with quality glue that passes the test at the lab of Linyi University.

Our Standard grade plywood uses one to two layers of B grade core depending on plywood thickness. However, with each layer of B grade core being held tightly together with 2 layers of A Grade complete cores on the top and bottom, the strength and durability can be assure. This is definitely where price meets quality.

Glue: E0, E1, E2,
Thickness: 2.7mm – 25mm
Core: Poplar, Combi,
Hardwood

Face: Okumen, Birch, Pine,
Pencil Cedar, etc.
Size: 1220mm x 2440mm (4'x8'),
915mm x 2135mm (3'x7')

Film Face Plywood

The strong and durable film faced plywood makes it an ideal material for system formworks. The panel keeps its shape regardless of changes in humidity and temperature.

With different types of glue and different level of Phenolic Resin paper used, the film faced plywood can be re-use for more than 20 times and over 3 years.

Block Board

Block Board is made up by strips of softwood or hardwood. The strips are glued together tightly before being heated and pressed in between 2 layers of A grade wooden core. This light weight and durable panel is excellent for kitchen countertops, paneling and partitions.

Core: Poplar, Paulownia, Falcata

Glue: E1, E2

Face: Okumen, Birch, Pine,
Pencil Cedar, etc.

Thickness: 15mm, 18mm

Size: 1220mm x 2440mm
(4'x8')

MDF

Our top of the line MDF is made from pure wood fibers and compressed under extreme heat and pressure. Due to the high quality and smoothness of the surface, our MDF can be painted or apply any melamine paper or HPL on the face or the back. No matter how you cut it or drill it, you will always have a perfect piece of material on your hand.

Core: Full Poplar, Poplar Mix

Glue: E1, E2

Thickness: 2.5mm - 25mm

Density: 680KG - 780KG

Size: 1220mm x 2440mm (4'x8')

Face: Plain, Melamine paper
or HPL

Chipboard

Our high quality Chipboard has a smooth and flat surface and it is strong and stable. It is made by stem of trees and fine small wood particle, thus, it has excellent screw retention strength. With its light weight and excellent durability, it is great material for manufacturing furniture, kitchen cabinet and shelving.

Core: Mixwood

Glue: E1, E2,

Water Resistance Glue

Thickness: 9mm - 25mm

Density: 650KG - 680KG

Size: 1220mm x 2440mm
(4'x8')

Face: Plain, Melamine paper
or HPL

OSB

Glue: MR, WBP

Thickness: 6mm - 21mm

Density: 650KG

Size: 1220mm x 2440mm (4'x8')

Hardboard

GLUE: MR, E1, E2

CORE: WOOD FIBERS

THICKNESS: 2.5mm – 3.2mm

SIZE: 1220mm x 2440mm (4'x8')

Paulownia Panel

Glue: E1

Thickness: 6mm - 21mm

Density: 330-350 KG

Size: 610-1220mm x 2440mm

MDF Slatwall Panel

Core: Full Poplar, Poplar Mix

Glue: E0, E1, E2
